

Physiotherapy and Older People
A resource booklet for student and newly qualified physiotherapists

This resource booklet forms the basis from which undergraduate and newly qualified physiotherapists working with older people can source further information. This booklet is about physiotherapy and older people. It is not intended as a full, stand-alone text in itself, and hence, not fully referenced, as an academic script would be. It is, however, anticipated that the references and websites provided will be used in conjunction with the document to enhance understanding and learning.

The 2nd edition has been fully revised with updated web links and features such as discussion points. The booklet is supplied with a CD containing the full text.
